INTERNATIONALSEARCHREPORT

International application No. PCT/IB2004/004459

A. CLASSIFICATION OF SUBJECT MATTER

Int.Cl. A61K38/22(2006.01), A61P25/00(2006.01)

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl. A61K38/22(2006.01), A61P25/00(2006.01)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
Published examined utility model applications of Japan 1922-1996
Published unexamined utility model applications of Japan 1971-2006
Registered utility model specifications of Japan 1996-2006
Published registered utility model applications of Japan 1994-2006

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

MEDLINE/CAPLUS/EMBASE/BIOSIS(STN)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	Nitta, J. et al, Ultramicroscopic structures of the leptomeninx of mice with communicating hydrocephalus induced by human recombinant transforming growth factor-beta 1, Neurol Med Chir (Tokyo), 1998, Vol.38, No.12, p. 819-24	3,4
A	TADA, T. et al, Induction of communicating hydrocephalus in mice by intrathecal injection of human recombinant transforming growth factor-beta 1, J Neuroimmunol, 1994, Vol.50, No.2, p.153-8 (abstract) PubMed [online], [retrieved on 21 Dec 2005], PMID: 8120136	3,4

Further documents are listed in the continuation of F	Box C. See patent family annex.
* Special categories of cited documents:	"T" later document published after the international filing date or ch is not priority date and not in conflict with the application but cited to
"A" document defining the general state of the art which considered to be of particular relevance	understand the principle or theory underlying the invention
"E" earlier application or patent but published on or after national filing date	the inter- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an
"L" document which may throw doubts on priority claim(s) is cited to establish the publication date of another citatio	or which
special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot
"O" document referring to an oral disclosure, use, exhibition means	combined with one or more other such documents, such
"P" document published prior to the international filing date	but later combination being obvious to a person skilled in the art "&" document member of the same patent family
than the priority date claimed	
Date of the actual completion of the international search	Date of mailing of the international search report
11.01.2006	24.01.2006
Name and mailing address of the ISA/JP	Authorized officer 4C 9829
Japan Patent Office	KAWAGUCHI Yumiko
3-4-3, Kasumigaseki, Chiyoda-ku, Tokyo 100-8915,	Japan Telephone No. +81-3-3581-1101 Ext. 3452
